

Sveabot V100

Design for Heavy Duty Sweeping

The No-Nonsense Sweeper. Pure Performance. Zero Distractions.

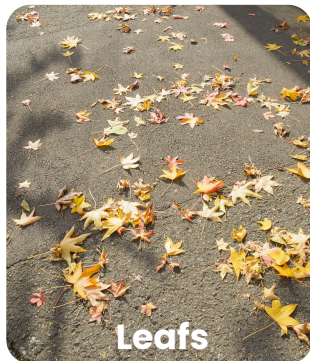

High-Capacity Sweeping Specialist

From fine dust and debris to plastic bottles and fallen leaves, this sweeper conquers it all. Built with a [trash bin around 35L](#) and a [700mm sweeping width](#), it handles heavy-duty tasks with ease – making large-area cleanup faster and effortlessly efficient.

Flawless Finish, Protected Space

Full Sweep

Say goodbye to dirt in corners. **Zero-Distance Edge Cleaning** covers every inch, leaving no blind spots and delivering a truly polished finish.

Agile Navigation

Engineered for tight spaces: its **600 mm narrow body** and **470 mm low profile** sweep deep under tables and shelves for complete coverage.

Dust Locked

The **filter** shields the robot's interior from dirt, while the **negative-pressure** system traps dust in the bin — for a cleaner machine, fresher air, and lasting performance.

Beyond Cleaning: Extra Mode for Smarter Security

With Cleaning Mode for sweeping and **Patrol Mode** for inspection, the V100 is both a cleaner and a guardian. When idle, it patrols, captures images and uploads them to the cloud — keeping your facility spotless and secure around the clock.

Designed for Convenience

Built with the user in mind, it features a **quick-release trash bin** and **fast battery-swapping**, allowing operators to keep the robot running with minimal downtime and maximum efficiency.

Unpredictable Condition Protection

An **alert light** enhances visibility in low-light environments, while a built-in **rain sensor** triggers the robot to return to its charging station at the first sign of rain, ensuring reliable performance in unpredictable conditions.

Smart Collaboration

Paired with **Sveabot S100 Pro** or **M100E**, it offers a **complete cleaning solution** — tackling trash first, then smudges — and handles nearly every mess with seamless coordination.
